V. Agenda

A. Baccalaureate Degree Update: Jennifer Merlic, Dean of Instructional Services, reported that a list of currently established lower division courses is expected to be published in time for fall enrollment. Development of the upper division courses will begin this spring with class enrollments planned for Fall 2016. The first cohort is expected to be about 60 students drawing from current graphic design students, recent high school graduates, and students from other local community colleges with similar lower-division curriculum. The Chancellor’s office is conducting weekly conference calls for all 15 community colleges participating in the pilot and other interested parties like the statewide Academic Senate. These discussions will provide updates on enrollment requirements, potential regulation changes to Title 5, and other issues. Efforts to establish an industry advisory board for the new degree program are underway, and input will be sought from the new advisory board to help guide development of the curriculum.

B. 2013-2014 Audit Report: Chris Bonvenuto, Chief Director of Business Services, provided an overview of the District’s 2013-2014 Audit Report and the Proposition 39 Financial and Performance Audits prepared by the District’s contracted independent auditor Vicente, Lloyd & Stutzman, LLP. The Auditor’s opinion was that the basic financial statements present fairly, in all material respects, the District’s financial position as of June 30, 2014.

C. Student Services Building Update: Greg Brown, Director of Facilities Planning, provided update on the Student Services building project. The final design work is very near completion on the drawings to be submitted next month to the Division of the State Architect (DSA). The project consists of a three-story, 111,000 square foot main building, a 493-space underground parking garage, and landscaped open space. When completed, approximately 300 staff members will be working in the building to provide services to SMC students in a single convenient location. The building is expected to be certified LEED gold. While it is difficult to predict the time that it will take for a DSA review, it is expected that the project will be in construction sometime in Spring of 2016.

Public Comment – None
