   The technological transformation underway compels SMC to cultivate a college culture that empowers its faculty and staff and prepares its students to master the skills, knowledge and abilities required to excel in the digital world. The effective use of technology is a priority in every function that the college performs and is an essential aspect of all current and future improvements to the college.

   With the radical expansion in technology over the next 20 years, it is essential we Santa Monica College cultivates a college culture that is ready to respond responsive to this rapid transformation. SMC is the #1 community college and we should be a leader and innovator for technology at the community college level. As part of Technology Planning we believe we need a set of values and a vision to guide for planning and prioritization of technology across SMC. Given the 21st century technology trends, we are committed to being making SMC a forward thinking leader, to inform planning how technology will improve our the institution, and to make making institutional decisions based on these technology needs.
